ORGANISATIONAL SKILLS

SOFT SKILLS

I am able to work in team, to cooperate in international contexts and with people with different cultural and professional background; I am able to respect tasks and roles: while working for architects offices and our own company, I learnt how to lead projects and coordinate different professionals.

MANAGEMENT AND LEADERSHIP SKILLS

Particular strengths

I recommend myself for the role of architect, as I know it in and out. I am a good designer, and I work hard to meet deadlines. Still, I would say practicality is my greatest asset. Designs are always a compromise of space constrictions, needs of the client (guidelines) and budget. To me, it is most important that after finishing the client has a space that is as functional and as esthetic as possible for their needs.

Achievements

One of the main achievements of my career is the establishment of my own architectural firm. For a long time, the firm consisted of four professionals: me - the only architect - and two engineers. The take-off of the firm required dedication and sacrifices. This called me to work hard, often overnight and during the weekends when necessary, with few holiday periods. Looking back, I feel proud to have handled a lot of work; and most importantly, I have never failed when my partners needed help. Thanks to this continuing commitment, the firm grew and expanded until today. Now, we have an Italo-French architect who is taking over and we have two promising trainees, one architect and one structural engineer. The company can stand on its own now, and I am extremely happy to see it growing.

A second, equally important result is that I was able to create this project in my own land, the biggest gamble of all; my land, as beautiful as it is, is not a place rich in resources and for many it is a place where it is difficult to turn dreams into reality. In spite of this, in spite of the bureaucratic difficulties and the fact that very often there are no truly specialised and competent companies, I have managed to create projects of which I am very proud, with the full satisfaction of having created small islands of happiness for my clients.

PROJECTS

07/2017 - 09/2017

Rigenera Terre di Acaya e Roca Designing and implementation of a participated urban renewal project in the area of Caprarica di Lecce - Vernole - Melendugno

The project won European Funds for community development and urban renewal
